Carvia Automotive s.r.o. - Purchasing

Request for Quotation CV-RFQ-2026-044

Classification: CONFIDENTIAL - handle according to the NDA signed on 12 March 2024

Item	Detail
Supplier	Autonom s.r.o.
Part	BR-330 rear axle mounting bracket, left + right (mirror parts)
Issued	20 October 2026
Quotation due	13 November 2026, 12:00 CET, via Carvia supplier portal only
Buyer	Ing. Ondřej Malý, Commodity Buyer Metal Parts
Questions	In writing via portal until 3 November 2026. Questions received later will not be answered.

1. Part description

Stamped bracket from hot-rolled steel strip S355MC, thickness 2.5 mm, width 48 mm. Surface protection: zinc-flake coating, min. 720 h neutral salt spray test (ISO 9227). Weight approx. 0.42 kg per piece. Two special characteristics (SC): hole position Ø 10.2 ± 0.1 mm and flatness 0.3 mm. Drawing CV-BR-330 rev. A is attached in the portal.

2. Volumes and timing

Year	2027	2028	2029	2030	2031
Volume L+R (pcs)	60 000	180 000	180 000	180 000	150 000

SOP: 1 September 2027. PPAP submission: 15 June 2027. Volume flexibility: ± 20 % without price change. Production tool must be capable of 110 % of peak annual volume.

3. Commercial terms

- Prices DAP Carvia plant Kolín (Incoterms 2020), in EUR, including packaging.
- Payment terms: 90 days end of month.
- Annual price reduction (productivity): 3 % per year from the second year after SOP.
- Raw material price index clause: not accepted. Prices are fixed for the whole lifetime.
- Tooling: paid by Carvia as lump sum after PPAP approval; tooling becomes property of Carvia.
- Quotation validity: 180 days.
- Long-term agreement for the whole lifetime of the project is a condition of nomination.

4. Quality

- Certification IATF 16949 is mandatory.
- PPAP level 3. Cpk ≥ 1.67 for special characteristics at PPAP, ≥ 1.33 in serial production.
- Quality target: 0 ppm. Maximum accepted: 25 ppm per year. Above this level escalation to CS1.
- Complaints according to Carvia Supplier Manual: D3 within 24 hours, D4 within 5 working days.

5. Logistics

- Packaging: returnable KLT 6280 provided by Carvia. Labels according to VDA 4902.
- Call-offs via EDI (VDA 4905). Supplier keeps safety stock of 10 working days of finished parts.
- Delivery performance target: 100 % on time. Below 98 % the supplier is put on improvement programme.

6. Sustainability

Supplier provides product carbon footprint (kg CO2e per part, cradle-to-gate) with the quotation. From 2028 the steel used must contain at least 30 % recycled content.

7. Liability

Costs caused by supplier-related line stoppage at Carvia are charged to the supplier, up to EUR 25 000 per incident, plus costs of sorting and rework.

8. Required content of the quotation

Completed cost breakdown (Carvia template CBD-03), tooling quotation, capacity confirmation, feasibility commitment, list of exceptions to this RFQ, product carbon footprint.

Appendix A - Supplier requirements for raw material

A.1 The supplier shall demonstrate at PPAP at least two approved sources of raw material (dual sourcing) for every steel grade used for Carvia parts.
A.2 Any change of raw material source requires prior written approval of Carvia, notification at least 6 months in advance.
A.3 Material certificates 3.1 according to EN 10204 for every heat.

Appendix B - Exceptions

Any deviation from this RFQ must be listed in the exception list. Deviations not listed are considered accepted by the supplier.
